

# Drupal upgrade

## context

dit document beschrijft hoe je Drupal bijwerkt naar een nieuwere versie

## voorbereiding

- maak een [backup van je drupal databank](#)
- maak een backup van je bestaande drupal bestanden:

```
tar -cvzf /tmp/drupal.tar.gz <drupalDir>
```

- zet je [site in maintenance mode](#)
- meld aan op de Linux server
- verwijder:
  - /core en /vendor `rm -rf core vendor`
  - bestanden in de top-level directory `rm -f *.* .[a-z]*`
- download de laatste release: `wget`  
<https://ftp.drupal.org/files/projects/drupal-x.y.z.tar.gz>
- pak de tarbal uit: `tar -xvzf drupal-x.y.z.tar.gz`
- zet de bestanden uit de nieuwe release terug:
  - `cp -Rv drupal-x.y.z/core .`
  - `cp -Rv drupal-x.y.z/vendor .`
  - `cp drupal-x.y.z/*.*`
  - `cp drupal-x.y.z/.[a-z]*`

## update

1. meld aan als admin gebruiker: <https://DrupalSite/user>
2. open nu: <https://DrupalSite/update.php>

## Drupal database update

✓ Operating in maintenance mode. [Go online.](#)

Use this utility to update your database whenever a new release of Drupal or a module is installed.

For more detailed information, see the [upgrading handbook](#). If you are unsure what these terms mean you should probably contact your hosting provider.

1. **Back up your code.** Hint: when backing up module code, do not leave that backup in the 'modules' or 'sites/\*/modules' directories as this may confuse Drupal's auto-discovery mechanism.
2. Put your site into [maintenance mode](#).
3. **Back up your database.** This process will change your database values and in case of emergency you may need to revert to a backup.
4. Install your new files in the appropriate location, as described in the handbook.

When you have performed the steps above, you may proceed.

Continue

- 3. kies: **Continue, Apply pending updates**
- 4. klik op **logged** om een rapport van de update te zien.

## afwerking

1. haal je site uit [maintenance mode](#)
2. verwijder de installatiebestanden: `rm -rf drupal-x.y.z drupal-x.y.z.tar.gz /tmp/drupal.tar.gz`
3. controle rapport: **Reports > Available updates**

Drupal core

Drupal core 9.1.0

Includes: Actions, Automated Cron, Bartik, BigPipe, Block, Breakpoint, CKEditor, Color, Comment, Configuration Manager, Contact, Contextual Links, Custom Block, Custom Menu Links, Database Logging, Datetime, Field, Field UI, File, Filter, Help, History, Image, Interface Translation, Internal Dynamic Page Cache, Internal Page Cache, Language, Link, Menu UI, Node, Options, Path, Path alias, Quick Edit, RDF, Search, Seven, Shortcut, Standard, System, Taxonomy, Telephone, Text, Text Editor, Toolbar, Tour, Update Manager, User, Views, Views UI

Up to date ✓

Modules

Backup and Migrate 5.0.0-rc2

Includes: Backup and Migrate

Up to date ✓

Node View Permissions 8.x-1.4

Includes: Node view permissions

Up to date ✓

- 4. status rapport: **Reports > Status rapport**

Status report ☆

Home » Administration » Reports

Here you can find a short overview of your site's parameters as well as any problems detected with your installation. It may be useful to copy and paste this information into support requests filed on Drupal.org's support forums and project issue queues. Before filing a support request, ensure that your web server meets the [system requirements](#).
