

configuratie

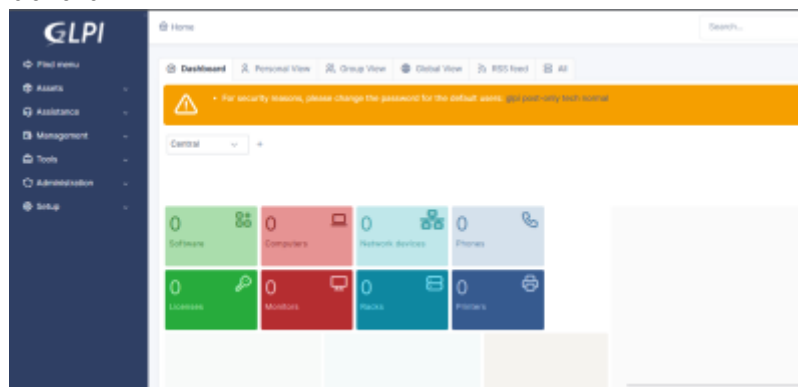

context

dit document beschrijft hoe je gLPI configureert, net na de [installatie](#), dus

configuratie

1. wijzig de standaard **wachtwoorden**.
2. schakel de **demo data** uit

3. activeer gLPI inventory: **Administration > Inventory > Enable Inventory**
4. activeer Marketplace: **Setup > Plugins: Marketplace**
 1. meld aan op [gLPI network](#)
 2. **Registration**: kopieer de registration key
 3. gebruik de sleutel om **Marketplace** te activeren
5. activeer onderstaande plugins vanuit Marketplace:
 1. gLPI inventory
6. **Administration > Rules: Rules for import and link equipments**
 1. **Printer update (by mac): Rule > Active:yes**
 2. **Printer import denied > Rule > Active:no**
 3. **NetworkEquipment update (by mac): Rule > Active:yes**
 4. **NetworkEquipment import denied > Rule > Active:no**
7. **Administration > gLPI inventory > General > General configuration: Agent modules**:
 1. Network inventory (SNMP)
 2. Network discovery

Nu ben je klaar om je eerste [inventory](#) uit te voeren:

1. installeer [gLPI agent](#)
2. maak een [discovery & inventory taak](#) aan
