

Nextcloud audit

 **Fix Me!** basis is goed. Nog wel wat finetunen.

context

dit document beschrijft hoe je Nextcloud nakijkt op gebruikersacties.

Niet onbelangrijk gezien bestanden vanop alle mogelijke apparaten een onwaarschijnlijke weg kunnen afleggen.

Het is ook een prima manier om **uploads** van bestanden te troubleshooten

installatie

- installeer de NC module **Auditing / Logging**
- meld aan op linux
-  **Fix Me!** open config/config.php
- voeg onderstaande lijnen toe:

```
'loglevel' => 3,  
'logdateformat' => 'F d, Y H:i:s',  
'logtimezone' => 'Europe/Brussels',  
'log.condition' => [  
    'apps' => ['admin_audit'],  
],
```

werking

- bewerkingen worden nu gelogd naar data/audit.log:

```
{"reqId": "YBKC0lfNqcu@wMAGcTlragAAAAC", "level": 1, "time": "January 28,  
2021  
10:22:03", "remoteAddr": "109.128.15.166", "user": "koen", "app": "admin_audi  
t", "method": "MKCOL", "url": "/remote.php/dav/files/koen/home/media/scans/
